Full Verbal Description

The bone itself is 0.21 - 0.27 cm thick. The hole is 0.24 cm. Fragment of a long bone from a medium to large mammal. It has 3 broken edges; the 4th edge is partially broken and partially cut. By this cut edge ^{there is} ~~shows~~ scoring on the bone surface running parallel to the cut edge. The ^{long} edges have rodent chewing in several spots. There is a bi-conically drilled hole. The surface is smooth, and may once have been glossy -- there are a few shiny patches left. No idea of use.

Not drawn
